Assumptions:

- We created an Office entity set so that the Administrative Staff are assigned to it.

- Each Office must have at least one Administrative Staff assigned to it.

- We created a Timetable entity set and it is a weak entity set because Timetable cannot be uniquely identified by its own attributes and requires the attribute from the Course entity set to identify itself.

- We created a 3-way binary relationship linking Professor, Laboratory, Graduate using a Research entity set.

- Not all Stakeholders have to make Comments.

- All Students must take at least one Course.

- Each Laboratory must have at least one Equipment.

- All Students must take at least one Course.

- Professors must check that the Courses he/she teach does not conflict with one another.

- Each Student has their own Timetable for the Courses that he/she takes.
